

LA ROSA GREEN FIT

VM & Display Show

London, March 3-5, 2009

Tasteful styles, research and experimentation will be on exhibition in the marvellous setting of La Rosa stand at **VM & Display Show**.

The suggestions will merge fashion's trend, with Opera più and Tamara Collections, up to the new important display solutions for big stores, such as: man and lady torsos, trouser hangers and window accessories. A refined and simple exhibiting answer which will smooth the buying orientation, because choosing La Rosa means opting for quality and reliability. The "griffe", in fact, holds values synonymous of the Italian excellence symbol in the world.

Values easily ascribable to the company, for style as well as for technology, through an optimisation of low environmental impact production's levels and... through a consumptions rationalization.

"Green" for La Rosa is a way to be not to appear.
